**PETITION UNDER 37 C.F.R. § 1.181**  
**IN RESPONSE TO NOTICE OF ABANDONMENT**

This Petition is being filed in response to the Notice of Abandonment mailed on October 21, 2003. (Exhibit 1). The Notice states that the above-referenced application has been abandoned for failure to timely file a proper reply to the Office letter mailed on March 17, 2003. In view of the remarks set forth below, Applicant respectfully request withdrawal of the Notice of Abandonment and reinstatement of the above-referenced application with its original filing date of November 19, 2001.

On March 26, 2003, Applicant timely filed a response to the Office Action Summary by facsimile transmission addressed to Examiner H. Dang at the facsimile number provided in the Office Action (Exhibit 2).

The facsimile transmission report is attached (Exhibit 3) as evidence the facsimile was transmitted and received by Group Art Unit 3600 of the Patent Office on March 26, 2003 at 12:24 pm pacific standard time.

In view of these facts, Applicant submit that the documents as described above were filed in a timely manner, so the above-referenced application was not abandoned and should not now be considered abandoned. Accordingly, it is respectfully requested that the attached documents be accepted and entered into the file for the above-referenced application. It is further respectfully requested that the Commissioner withdraw the Notice of Abandonment and reinstate the application with its original filing date.

It is not believed that any fees are required for filing this Petition due to the mistake being on the part of the Patent Office. However, the Commissioner is authorized to charge Deposit Account No. 50-0457 for any fees which may be required.

Respectfully submitted,

Date: October 30, 2003

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20, 31-56 and 61-81, drawn to a system or method usable with a subterranean well, classified in class 166, subclass 250.001.
  - II. Claims 21-30, drawn to a resistivity tool, classified in class 324, subclass 352.
  - III. Claims 57-60, drawn to a method of establishing fluid communication between an exterior of a casing and its interior, classified in class 166, subclass 297.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II or III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the detailed structure of the resistivity tool (e.g., transmitter, receiver, circuit) of Group II or the piercing of the casing of Group III are not required by the combination claims (e.g., see claims 1, 11, 75, 79). The subcombination has separate utility such as a tool for measuring resistivity having no packer or/and puncher (Group II) and a method for producing a well wherein the communication between the exterior of the casing and its interior thereof is for the purpose of production.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for one

Art Unit: 3672

Group is not required for another Group, restriction for examination purposes as indicated is proper.

4. This application further contains claims directed to the following patentably distinct species of the claimed invention: the species of figures 2-12; the species of figures 13-14; the species of figures 13-14; the species of figure 15; the species of figures 16-17; the species of figure 18; the species of figures 20-21

Applicant is further required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

**Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3672

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Dang whose telephone number is 703-308-2149. The examiner can normally be reached on 9:15-5:45 Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Bagnell can be reached on 703-308-2151. Sir:

**PETITION UNDER 37 C.F.R. § 1.181**  
**IN RESPONSE TO NOTICE OF ABANDONMENT**

This Petition is being filed in response to the Notice of Abandonment mailed on October 21, 2003. (Exhibit 1). The Notice states that the above-referenced application has been abandoned for failure to timely file a proper reply to the Office letter mailed on March 17, 2003. In view of the remarks set forth below, Applicant respectfully request withdrawal of the Notice of Abandonment and reinstatement of the above-referenced application with its original filing date of November 19, 2001.

On March 26, 2003, Applicant timely filed a response to the Office Action Summary by facsimile transmission addressed to Examiner H. Dang at the facsimile number provided in the Office Action (Exhibit 2).

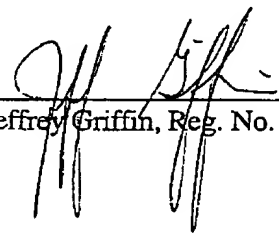

The facsimile transmission report is attached (Exhibit 3) as evidence the facsimile was transmitted and received by Group Art Unit 3600 of the Patent Office on March 26, 2003 at 12:24 pm pacific standard time.

In view of these facts, Applicant submit that the documents as described above were filed in a timely manner, so the above-referenced application was not abandoned and should not now be considered abandoned. Accordingly, it is respectfully requested that the attached documents be accepted and entered into the file for the above-referenced application. It is further respectfully requested that the Commissioner withdraw the Notice of Abandonment and reinstate the application with its original filing date.

It is not believed that any fees are required for filing this Petition due to the mistake being on the part of the Patent Office. However, the Commissioner is authorized to charge Deposit Account No. 50-0457 for any fees which may be required.

Respectfully submitted,

Date: October 30, 2003

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II or III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the detailed structure of the resistivity tool (e.g., transmitter, receiver, circuit) of Group II or the piercing of the casing of Group III are not required by the combination claims (e.g., see claims 1, 11, 75, 79). The subcombination has separate utility such as a tool for measuring resistivity having no packer or/and puncher (Group II) and a method for producing a well wherein the communication between the exterior of the casing and its interior thereof is for the purpose of production.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for one

Group is not required for another Group, restriction for examination purposes as indicated is proper.

4. This application further contains claims directed to the following patentably distinct species of the claimed invention: the species of figures 2-12; the species of figures 13-14; the species of figures 13-14; the species of figure 15; the species of figures 16-17; the species of figure 18; the species of figures 20-21

Applicant is further required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

**Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Dang whose telephone number is 703-308-2149. The examiner can normally be reached on 9:15-5:45 Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Bagnell can be reached on 703-308-2151.
